

# Schonell App Instructions for Residents

## Step 1:

Download the Schonell Interphone app

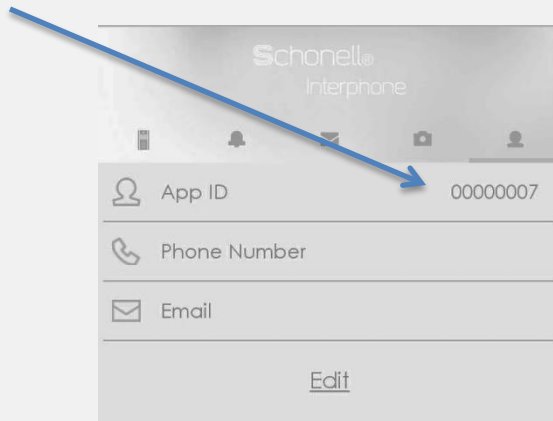

## Step 2:

Create an account (free) with a valid email address

Verify the activation email.

Sign in and your 8 digit **App ID** can be found on the last tab.

## Step 3:

Submit your app ID or local telephone number to building management.

\*The interphone system is able to call you on a regular telephone as well as the app.

\*The system will call your number in priority.

\*It is recommended to submit a few an APP IDs and telephone numbers for each unit.

\*To unlock doors during a telephone call, press 1 on your keypad.

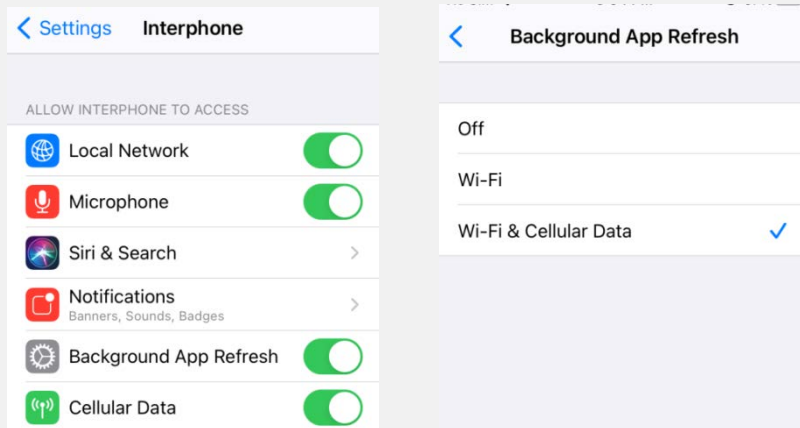

# Schonell App Settings/ Troubleshooting: Apple Devices, iOS

Your app ID must be registered onto the interphone panels by your property manager.  
If your App ID is not registered properly, you will not be able to receive a video call.

## 1. Check your iPhone's settings

Settings > Interphone App

Do make sure that your phone's settings are configured correctly

## 2. Open the app; make sure that you are logged in

As a reminder, you may close the app, or keep it in the background, but DO NOT log out of it!  
Rebooting may result in killing your app service, and you may get logged out.

\*\*microphone and other options may only pop up after your first successful call.

## 3. Reinstalling the app might help fix the issue

If you have the correct settings and it fails to work correctly, try deleting the app, and installing it as new.  
This might fix the issue that you are facing.

## 4. Latest App version and iPhone software

For best performance, get the latest app version the Apple Appstore.

## 5. Contact Us

If you still face issues, kindly contact our support team at [www.schonell.co/contact](http://www.schonell.co/contact)

# Schonell App Settings/ Troubleshooting:

## Android, Google Devices:

Your app ID must be registered onto the interphone panels by your property manager. If your App ID is not registered properly, you will not be able to receive a video call.

### 1. General Android phone settings and permissions

Do make sure that your phone's settings are configured correctly, this varies with phone brand and android version

1. Enable Advanced **Notifications** (Badges, Sounds, Banners, "**Others- Schonell\_call- tap and enable all**").
2. Make sure that **Microphone, Phone** and **Storage** are turned on.
3. Enable **Data Usage** for the app.
4. Make sure that "**Appear On Top**" or "**Draw over other apps**" is turned on or enabled.
5. Check that there are no apps that might be interfering in your phone's background. (Enable **Autostart**, Disable **Doze feature**).
6. Turn off **Battery Saving Restrictions** for the app.
7. Make sure that you are **Logged In** on your app.

# Schonell App Settings/ Troubleshooting:

## Android, Google Devices:

### Common issue A: My phone rings but there is no pop up

This occurs because advanced notifications are not turned on.

Kindly go to **Notifications> Other> schonell\_call**

Tap on **schonell\_call** and enable the following sub settings (if any):

### Common issue B: My phone is unable to receive calls after app is closed

This occurs because your phone is putting the app to sleep after you close the app due to battery saving functions by your phones manufacturer.

Depending on your device brand and android version,

you may need to **disable** the following for the Schonell Interphone app :

1. Battery optimization/ Power saving / Battery restrictions
2. Doze mode (Xiaomi, Huawei)

And **enable**

1. Autostart (Vivo, Xiaomi, Huawei, Oneplus)
2. Autolaunch/ Run in background (Vivo, Xiaomi, Huawei, Oneplus)
3. Background data usage
4. Enable high background battery consumption (Vivo)
